Summary

Senior Frontend Engineer with 2+ years building scalable React/TypeScript applications, from consumer-facing platforms to complex backoffice dashboards with finance modules, real-time data tables, and dynamic reporting. Promoted twice in under 2 years. Experienced in Agile remote teams.

Education

Mahatma Jyotiba Phule Rohilkhand University **Sep. 2019– May 2023**
Bachelor of Technology in Computer Science and Information Technology *Bareilly, UP*

Experience

EdgeNRoots **Jan 2024 – Present**
Software Engineer *Remote*

- Delivered multiple client-facing web platforms including BnBHomes (Property rental platform) and Crossroads Helpline (Roadside Assistance) — handling end-to-end frontend from consumer websites to full backoffice systems.
- Built and maintained complex backoffice dashboards across projects — multi-step forms, advanced filterable data tables, finance modules, chart/graph visualizations, and exportable report generation for internal operations teams.
- Developed scalable, reusable UI architecture across multiple products using Redux Toolkit, Tailwind CSS, and MUI — ensuring design consistency, faster delivery cycles, and maintainable codebases.
- Integrated REST APIs and WebSockets for real-time data updates across dashboards; collaborated directly with backend teams and stakeholders to align frontend delivery with business requirements.
- Worked across the full frontend spectrum — pixel-perfect UI design to data-heavy admin panels — in Agile remote teams; received 2 promotions for consistent technical ownership and delivery quality.

Madrocket **Sep 2023 – Dec 2023**
React Developer Intern

- Developed a school web app with features like teacher, student management, admissions, assignments, and homework.
- Built a School Management App (student/teacher admin, admissions, assignments) using ReactJS + Firebase (Auth, Firestore)..
- Handled both frontend and backend logic to ensure a seamless user experience.

Projects

BnBmeHomes | *React, TypeScript, Redux Toolkit, Tailwind CSS* **January 2024**

- Consumer platform with booking, auth, and search; backoffice with revenue dashboards, KPIs, approval workflows, and report exports.
- Focused on responsive design with React and ensured the application's scalability and performance..

Crossroads Helpline | *React, TypeScript, Redux, MuiKit* **November 2024**

- Implemented user authentication and role-based access, allowing user and clients to interact efficiently.
- Enabled TypeScript strict mode and implemented Jest unit testing, reducing regression defects by 30

Technical Skills

Languages: C++, Python, TypeScript, SQL
Frontend : React.js, Next.js, TypeScript, Redux Toolkit, React Query, React Hook Form
UI/Styling: Tailwind CSS, MUI, Shadcn/UI, Styled Components, Recharts, Chart.js
AI Tools and Workflows: Cursor, GitHub Copilot, Claude (Anthropic), Gemini, v0 by Vercel, Prompt Engineering, AI-assisted development workflows

WebSockets/Tools: Git, GitHub, Postman, Vercel, CI/CD, Agile/Scrum, VS Code

Leadership / Extracurricular

∗ Actively participated in GirlScript Summer of Code (GsSoC), developing a full-stack website while collaborating with other open-source contributors. Led features, code reviews, and documentation, ensuring timely delivery of high-quality work.
∗ Led the development of Crossroads, a full-stack site using React, Express, and MongoDB. Coordinated tasks among team members, ensuring seamless integration of frontend and backend features while optimizing user experience.
